

- Read the article below and summarize it in your own words as far as possible in English.
- Suggested length: 60-70 words
- Write your summary in the space provided on your answer sheet. Any writing outside the space will not be graded.

Boxing has been a popular sport for centuries, combining physical strength, strategy, and endurance. It is not only a competitive sport but also a form of entertainment that attracts millions of fans worldwide. While boxing has its supporters, it also faces criticism regarding its risks and impact on athletes.

Supporters of boxing argue that the sport offers significant benefits to participants. It helps build discipline, mental toughness, and physical fitness. For many athletes, boxing provides opportunities to rise out of challenging circumstances and achieve personal success. Additionally, the sport generates considerable economic benefits through ticket sales, broadcasting, and sponsorships, contributing to local economies and providing jobs.

On the other hand, critics express concerns about the dangers of boxing. The physical impact of repeated blows to the head can lead to long-term health issues, such as brain injuries and cognitive decline. Furthermore, the sport has been criticized for prioritizing profits over the well-being of athletes. Some argue that stricter safety regulations and better medical support are necessary to ensure participants' health. These concerns have led to ongoing debates about whether boxing should continue as it is or undergo significant reforms.
